

Please note the following when completing the survey:

1. You will need to open the linked Excel files for A) the NERVES Survey and B) the Joint NERVES and SNIS NeuroInterventional Survey and save them to your hard drive/network. Please save the files as “NERVES” or “NeuroInterventional” plus the name of your practice (if you receive any messages regarding compatibility of formatting, please click "continue" and proceed with saving the file as is). You can then complete the surveys at your convenience in different stages if you wish to do so. In other words, you do not have to complete the surveys in one sitting. Simply re-save your changes each time you enter new data.
2. Please complete the survey questions as completely as possible to the level of detail which you have available. Please refer to the instructions when completing the surveys. Neurosurgery practices that employ Neurointerventionalists should report data for those providers for **both** the NERVES Survey and the NeuroInterventional Survey.
3. If you have any questions about either survey, please e-mail Katz, Sapper & Miller: NERVES@ksmcpa.com. After you have completed the survey questions, please e-mail your completed survey Excel files to NERVES@ksmcpa.com no later than **November 30th!** Katz Sapper & Miller will email a confirmation upon receiving each completed survey. If you do not receive a confirmation email within seven (7) days of submission, send a follow-up email to ensure receipt of the completed surveys so that your data is included in the results and you receive a complimentary copy. **We are targeting an electronic distribution in February 2023.**
4. **NERVES Survey:** Last year, 55 practices contributed their practice data to the NERVES Survey, representing 632 Neurosurgeons, 306 Nurse Practitioners, 262 Physician Assistants, and 197 other providers! In 2022, we encourage our entire NERVES membership to complete the NERVES survey. Please remember that participants of the NERVES survey will receive a complimentary report of the survey results. NERVES members who do not participate in the NERVES Survey and non-members may purchase the report for **\$2,000 and \$2,500 respectively.**
5. **JOINT NERVES and SNIS Interventional Survey:** We encourage all NERVES practices and SNIS practices to complete the new joint NERVES & SNIS Neurointerventional survey this year. Please remember that participants of the Joint NERVES and SNIS Interventional survey will receive a complimentary report of the survey results. NERVES and SNIS members who do not participate in the joint NERVES and SNIS NeuroInterventional Survey and non-members may purchase the report for **\$2,000 and \$2,500 respectively.**
