

General Session V – Distance Medical Care

Peter A. Rasmussen, MD, FAHA, FAANS, FSNIS, Cleveland Clinic

Description:

Will discuss current state of the spectrum of telemedicine/digital health offerings and capabilities, both synchronous and asynchronous, and their current role in care delivery. Following this, there will be a discussion of a possible future of healthcare involving non-traditional digital giants.

Objectives:

The participant will be able to:

- Describe use of virtual visits in healthcare
- Understand how remote patient monitoring programs can assist in chronic disease management
- Realize the future directions of digital health tools in neurosurgery and US health care delivery.
